Universal Design for Learning: The Three Block Model

Presenter: Jennifer Katz, Ph.D, Assistant Professor, Inclusive Education, Faculty of Education, University of Manitoba and consultant, teacher, researcher and author of *Teaching to Diversity: The Three Block Model of Universal Design for Learning*.

Building inclusive learning communities requires students to experience school as a place where they belong, are valued, and contribute. The Three Block Model of Universal Design for Learning is an effective approach to classroom management, planning, instruction, and assessment that creates a compassionate learning community from K-12. Developed by Dr. Katz, The Three Block Model of UDL has been implemented in elementary and high schools across three provinces, and has been shown to increase student engagement, achievement, critical thinking, self-concept, respect for diversity, prosocial behavior, and teacher satisfaction and self-efficacy for all students, including students with disabilities, students who are culturally and linguistically diverse, and students of Aboriginal descent.

Dr. Katz is the author of “Teaching to Diversity: The Three Block Model of Universal Design for Learning” and teaches courses and conducts research related to inclusion and the Three Block Model of UDL. She has been a sessional lecturer, educational consultant, classroom teacher, editor, and guidance counselor. Her work as an advocate of inclusive education and universal design for learning (UDL) has spanned several provinces and territories, and multiple audiences, including university courses, academic conferences, parent advocacy groups, educational conferences, school and division based professional development workshops, and most importantly, direct work with children and youth in schools and alternative settings.
